

STEFAN VODILOVSKI

SOFTWARE ENGINEER

ABOUT ME

Tech enthusiast with a passion for turning complex problems into efficient solutions. Versatile across languages and frameworks, I thrive on continuous learning and innovation. With polished communication skills, I am quickly able to fit in any work environment and collaborate effectively with colleagues and clients. Let's build the future of tech together!

EDUCATION

Faculty of Computer Science and Engineering, UKIM

Software Engineering and Information Systems

2021 - present, Skopje

High School "Josip Broz Tito"

Natural Science Track, Mathematics Major

2017 - 2021

SKILLS

- Programming in Python, Java, Go, C, C++
- Web Development (FastAPI, Flask, Spring, NodeJS, Gin, React, Angular)
- DevOps (CI/CD, Docker, GitHub Actions, Bitbucket Pipelines)
- Database systems, ETL pipelines, Data Warehousing, SQL, NoSQL
- Cloud systems(AWS, GCP, Azure)
- Data analysis and visualization
- Python libraries (PyTorch, Tensorflow, scikit-learn, Pandas, OpenCV)
- Deep Learning (NLP, Time Series)
- Advanced knowledge of OOP, design patterns and algorithms

EXPERIENCE

Inellipse, Bitola
Software Engineer
2023

Winery MK
Web Application Development
Spring + React

Child-safe ChatGPT
RAG Service Development
Go lang.

Sign Language Detection
ML Model Development
Python (Keras)

Transaction Processor
Backend Development
Go lang.

Social Media App
Backend Development
Python
